SECTION 4: First Aid Measures

4.1 Description of first aid measures

Inhalation: Although this product is not known to cause respiratory problems, if breathing is difficult, remove to fresh air and provide oxygen.

Get medical attention if cough or other symptoms develop.

Skin contact: Wash affected area with soap and water.

Get medical attention if irritation develops or persists.

Eye contact: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes.

Get medical attention if irritation develops or persists.

Ingestion: Move victim to fresh air, if not breathing, give artificial respiration, get medical attention.

4.2 Most important symptoms and effects, both acute and delayed

Inhaled: The material is not thought to produce adverse health effects or irritation of the respiratory tract (as classified by EC Directives using animal models).

Nevertheless, good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: Although ingestion is not thought to produce harmful effects (as classified under EC Directives), the material may still be damaging to the health of the individual, following ingestion, especially where pre-existing organ (e.g. liver, kidney) damage is evident.

Present definitions of harmful or toxic substances are generally based on doses producing mortality rather than those producing morbidity (disease, ill-health).

Skin contact: Skin contact is not thought to have harmful health effects (as classified under EC Directives) the material still produce health damage following entry through wounds lesions or abrasions.

Eye: Although the material is not thought to irritant (as classified under EC Directives), direct contact with the eye may produce transient discomfort characterised by tearing or conjunctival redness (as with windburn).

Chronic: Long-term exposure to the product is not thought to produce chronic effects adverse to health (as classified by EC Directives using animal models).

Nevertheless exposure by all routes should be minimised as a matter of course.

4.3 Indication of any immediate medical attention and special treatment needed.

Get medical attention and treat symptomatically.

to keep exposure to airborne contaminants below the exposure limit.
- 8.2 Personal protective equipment:
Eye-face protection: Wear safety glasses.
Skin protection: Wear protective clothing.
Respiratory protection:
Use respirators and components tested and approved under appropriate
government standards such as NIOSH (US) or CEN (EU).
